

I love my xm radio and will never go back to local fm stations again. With local stations I have no variety with music or news. I'm very upset with the FCC and it's attack on freedom of speech. The National Association of Broadcasters already decides what you listen to on fm stations. They decide what music is popular and what is not. They have ruined fm radio and now want to ruin xm radio. I pay for my xm for this reason. You can only listen to the same song play so many times a day. I also hope that Howard Stern and others find a home on satellite radio so that they are free to say what they want to. I'm asking you to please reject nab's petition 04-160 and let freedom of speech mean something again. I'm completely in support of xm radio.
